

ADT's COMMUNITY ASSOCIATION PROGRAM

Enhance the safety and security of your community while reducing costs with our comprehensive alarm monitoring services under a bulk agreement. By partnering with us, property managers can provide residents with reliable, 24/7 monitoring at a fraction of the cost of individual plans.

Offering alarm monitoring service to homeowners provides significant benefits for both property managers and residents. By negotiating a group rate, property managers can secure lower costs for homeowners while ensuring a consistent and high-quality security service across the community. This not only enhances the overall safety of the property, but also adds value by reducing the risk of crime and emergency response time.

By implementing a bulk alarm monitoring service, property managers can improve homeowner satisfaction, increase property appeal and demonstrate a commitment to safety and security.

Let us customize a proposal tailored to your community's needs. We can include Cellular Communication, Smart Home Devices and Interactive Services along with our Quality Service Plan.
