Big Picture Thinking. | Pratical Approach. | Sustainable Design.

EXPERIENCE

- Demand Response Ventilation Systems
- Variable Flow Piping Systems
- Variable Exhaust Systems
- Variable Refrigerant Flow Systems
- Heat Recovery Systems
- Geothermal Systems
- Radiant Systems
- Dedicated Outside Air Systems
- Displacement Ventilation Systems
- Chilled Beam Systems
- Natural Ventilation & Lighting
- Photovoltaic Systems
- Solar Thermal Systems
- Wind Power Systems
- Direct Digital Controls Systems
- Commissioning
- Energy Incentive Programs
- Efficient Lighting Systems & Controls Energy

18 ENGINEERING AWARDS

Including 3 International Awards

OVER \$3.5MM IN INCENTIVES

Most incentives procured by a ComEd Trade Ally (2014)

Elara Engineering is a full-service Mechanical, Electrical, Plumbing, Fire Protection and Information Technology (MEPPIT) consulting engineering firm with the experience and proven track record to offer the best practical solutions for the analysis, design and construction oversight of building and utility systems.

SERVICES PROVIDED

- Energy Audits
- MEPPIT Assessments
- Infrastructure and Opportunity Assessments
- Front-End and Master Planning
- Sustainable Energy and Feasibility Studies
- Utility Analyses
- MEPPIT Design (New Construction & Retrofit)
- Energy Modeling
- LEED Consulting
- Green Solutions
- Due Diligence
- Troubleshooting
- Steam, Hydronic and Air-Side System Analysis
- Commissioning
- Retro-Commissioning
- Benchmarking
