

The world's
smartest
temperature
control system

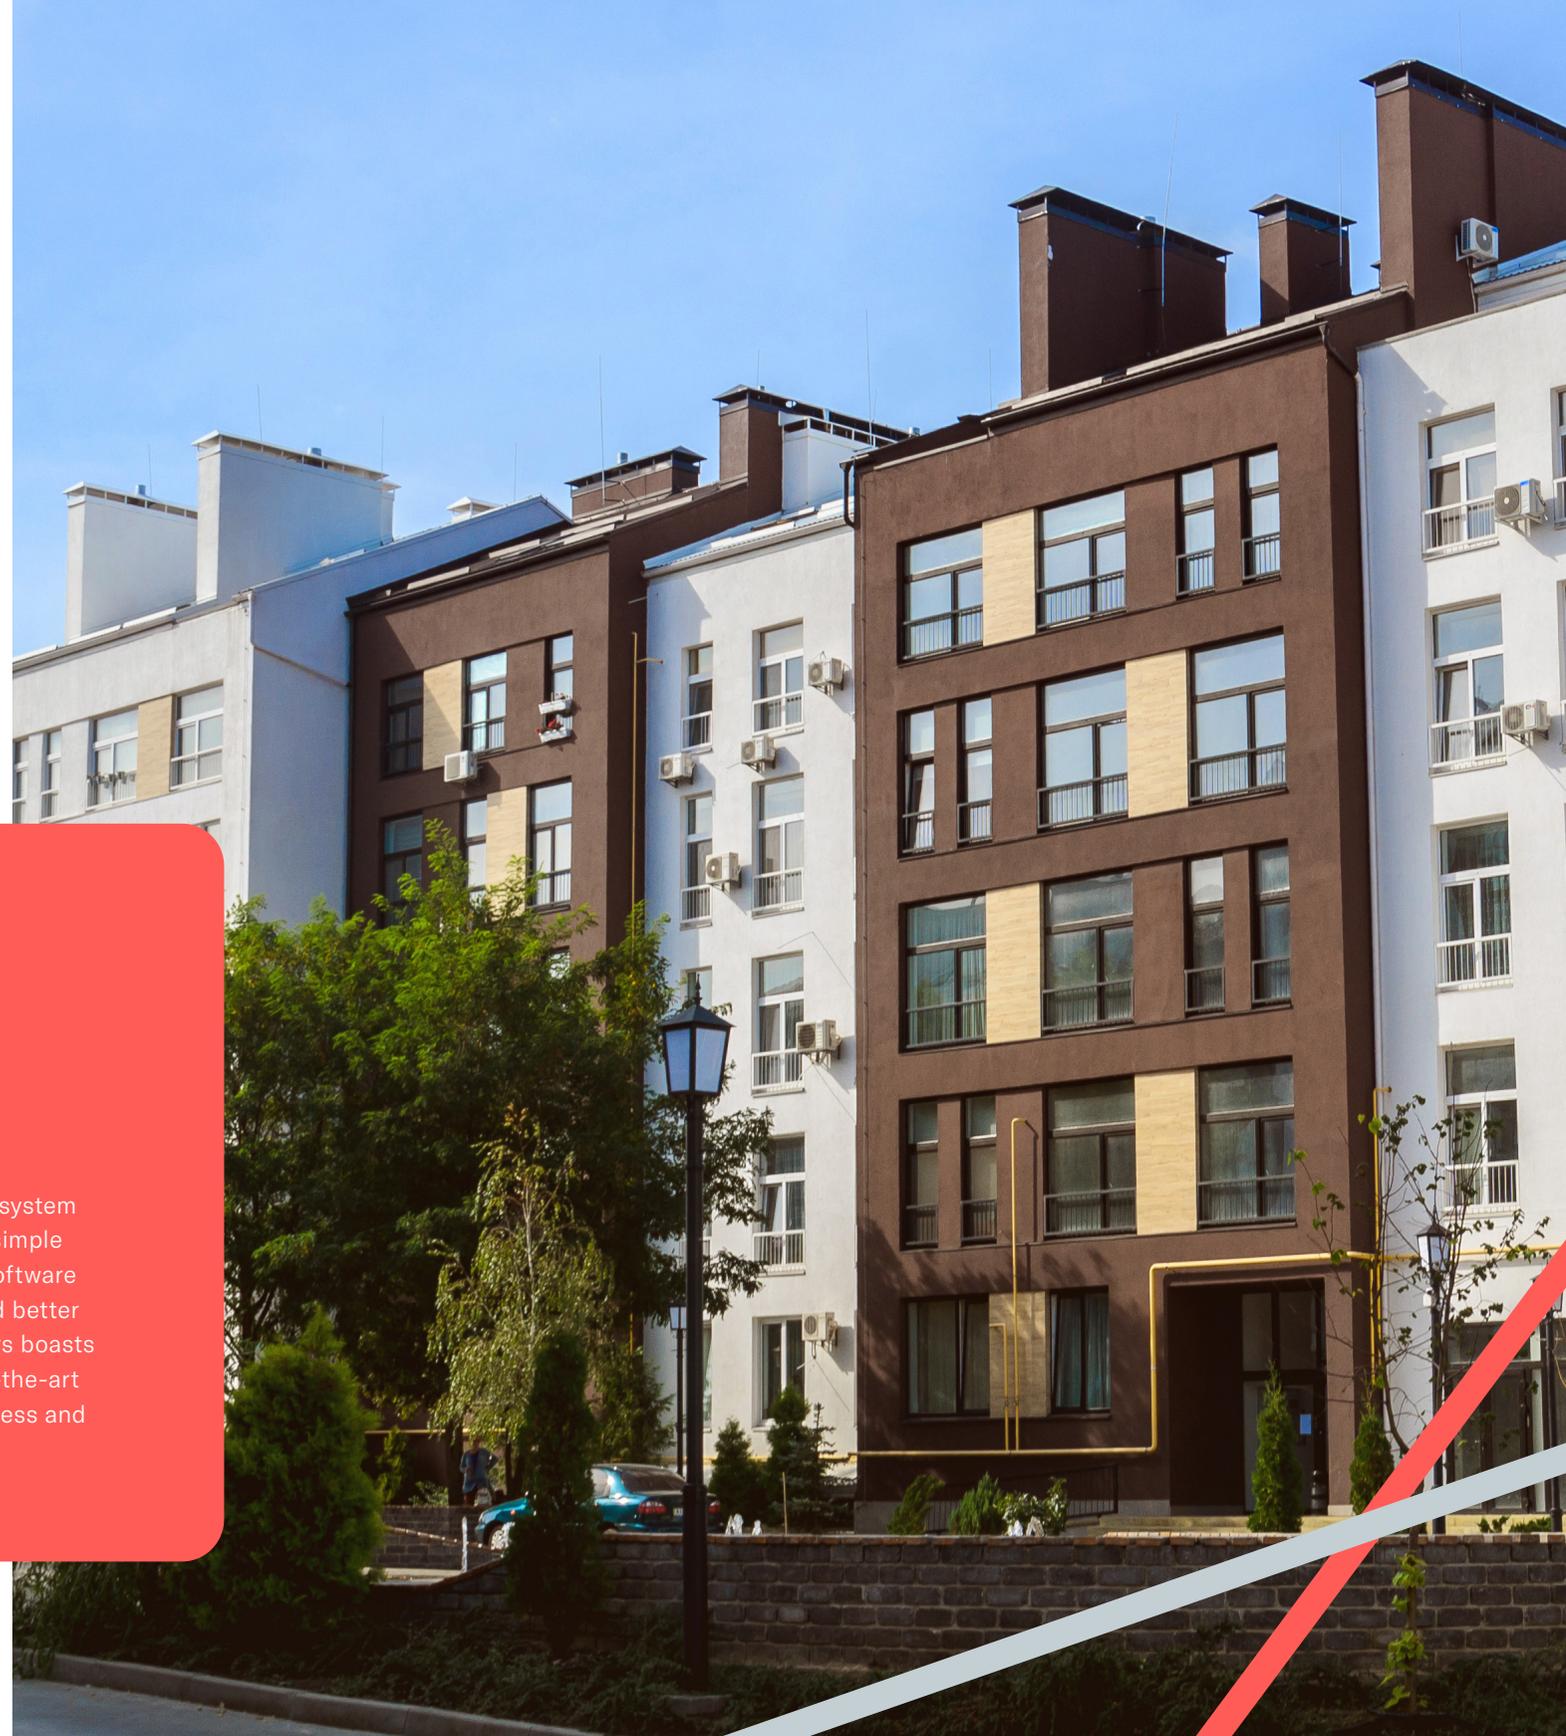

✿ WHO WE ARE

The leader
in next-gen
temperature
and energy
control.

✿ OUR MISSION

Control tomorrow™

Stealth™ is a powerful boiler control system with sophisticated features that are simple to use. Cutting-edge hardware and software offer higher savings, lower waste, and better control. A complex network of sensors boasts unparalleled accuracy while state-of-the-art software offers remote, real-time access and data analysis.

✦ WHO WE SERVE

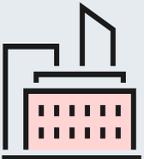

Residential

Multifamily buildings and complexes

Commercial

Retail, services and mixed-use buildings

Industrial

Production plants and manufacturing equipment

✦ WHY ENTECH

The world's smartest temperature control pays for itself in under a year

32%
Annual Savings

\$16,843
Total Savings

12,956
Therm Savings

Entech's unique technology utilizes precision sensors and AI-led data to provide 24/7 access to real-time analysis, giving you total control of your building's heating, cooling and more. Our Stealth tech is designed to lower your energy costs by roughly 32% annually.

Precision perfect data

Stealth delivers second-by-second cycle lengths and degree-by-degree valve control for detailed oversight. Get alerts regarding problems before they happen, access advanced boiler analytics, and receive superior support.

Get Stealth for
FREE

Take advantage of local government rebates and incentives. We'll handle the paperwork and hand you the savings. Contact Entech to see if you qualify.

Stealth's installation process: **It's fast.**

Intro Call

We'll discuss your buildings' needs, relevant state laws, and your current heating situation.

Analysis

Our technicians will analyze the heat distribution in your building and place sensors where they count.

Installation

We'll start the Stealth software and ensure it all works. No wifi? We'll install it and gift you with 30 days FREE.

Payback Time

You make your investment back in 12 months or less, and enjoy year-over-year savings.

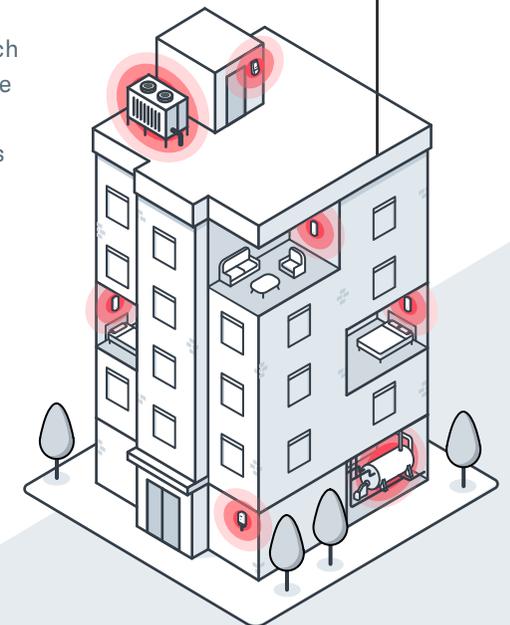

* HARDWARE AND SOFTWARE

Innovative tech for blazingly fast, blazingly smart boiler control.

An exhaustive network of precision sensors are strategically placed throughout the building, generating the most accurate readings available and with an array of add-ons to choose from, you can customize your boiler control system.

Collected data is processed through our Stealth software which creates a fast, flexible, and remote command center with granular control and infinite configurations within its intuitive interface for hyper-efficient heating. The machine learning auto-calculates temp based on sensor input and routinely self-adjusts, saving an additional 10% in energy costs.

Sensors are strategically placed throughout the building, generating the most accurate readings...

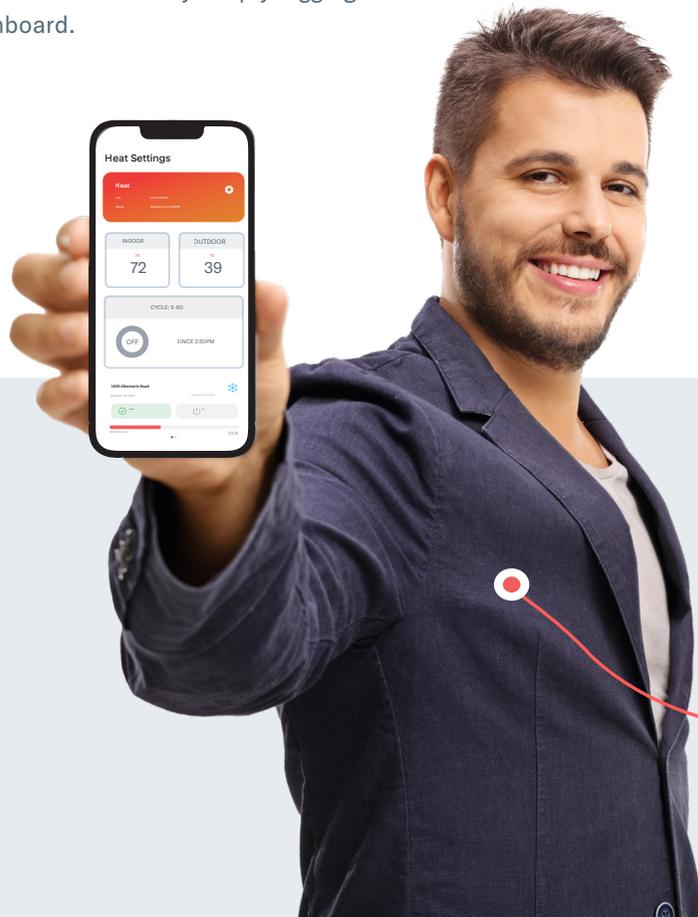

THE BENEFITS

It's in the palm of your hands

Access

With our intuitive web-based platform and powerful app, building owners and managers can see what's happening in their buildings from anywhere in the world by simply logging into the dashboard.

Security

Our platform utilizes an advanced network of redundant servers, including local main, local backup, multiple remote backups, and dual internet servers running side-by-side for 99.99% uptime. Our onsite IT team monitors our servers, ensuring absolute reliability.

Data

We deliver comprehensive graphs and data charts, automatic real-time alerts, on-demand reports, and setting overviews of boiler room sensors, water meters and apartment sensors so you are always in the know and always in control.

Conservation

Get more out of every gallon when our real time smart weather data and human behavior analytics combine with our systems and services. On average, an Entech property conserves hundreds of therms/gallons each heating season.

MEMBERSHIP PLANS

High-tech software meets high-touch service

Entech offers two membership service plans to fit your needs. Choose between our basic Entech Pro and the advanced Entech Pro+. Both plans deliver top-tier services that act as the perfect complement to your boiler control system.

Entech Pro

Tech support

Unlimited access to our customer support specialists via phone, email, text, or chat.

Full-feature access

Get beyond-basic Stealth notification features and access to fine-grained temperature control with Entech Pro.

An extra pair of eyes

Our experts monitor Stealth for you, assessing properties, tweaking settings, pinpointing inefficiencies, and helping you save even more.

Entech Pro+

Everything Entech Pro members receive plus:

Never ending warranty

Every Stealth installation includes 12 months of complimentary coverage. Pro+ extends that warranty indefinitely.

Next day service

The Entech Pro+ plan guarantees next-day service for fast, efficient repairs.

Annual tech check

An annual review and optimization of your Stealth setup ensure that everything functions at peak performance.
