INTELLIGENT VIDEO MONITORING TOOLS

Strengthen Security Operations with Intelligent Video Monitoring Tools

Reduce false alarms, minimize incidents, and streamline security with OpenEye's intelligent video monitoring tools.

OpenEye Web Services (OWS) enhances security operations by optimizing workflows, reducing unnecessary actions, and helping stop events before they become incidents. OWS equips security operations with tools to ensure there's timely, targeted responses when it matters most.

Reduce False Alarms

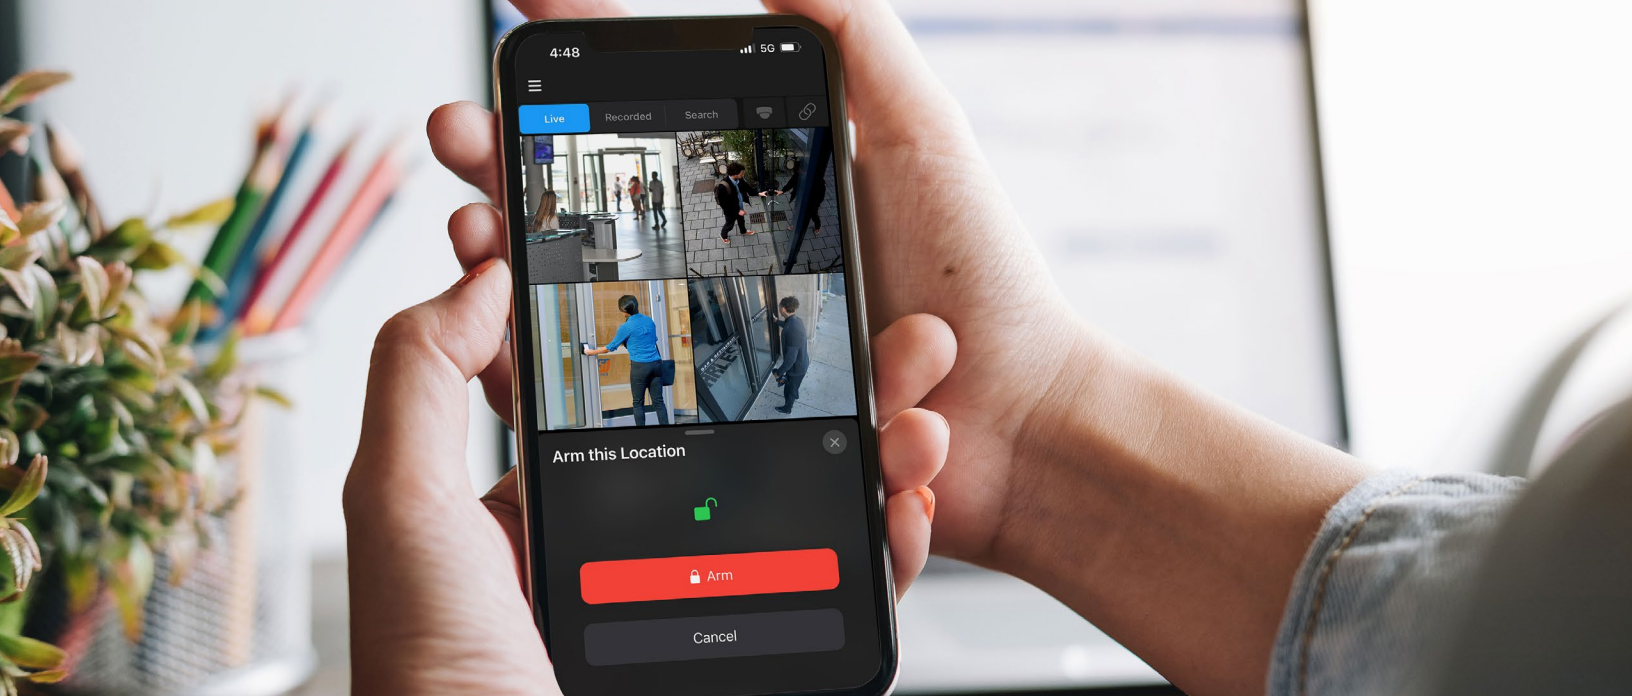

Improve security operations and effectiveness by optimizing workflows to reduce false positives with advanced tools.

Deter Incidents

Deploy OpenEye hardware deterrence solutions, including white light, to stop events before they become incidents.

Streamline Operations

Create efficiencies across locations and your teams with a centralized and integrated video security platform.

Streamline Your Surveillance

Our powerful cloud video platform gives you the tools you need to reduce false alarms and improve efficiency while fortifying business safety.

Location Arming

Use third-party alarm panels, sensor, or OWS as the location's armed state, filtering alerts to get notified when it matters most.

Virtual Arm / Disarm

Arm or disarm a location via the OWS web browser or OpenEye mobile apps to virtually secure a location from wherever you are.

Active Deterrence

Strengthen security and minimize risk by deploying active deterrence including a white light on OpenEye Cameras, powered by OWS alerts.

Powerful Analytics

Leverage OpenEye's AI-powered and third-party analytics to cut through the noise to detect real threats and deliver timely alerts during critical incidents.

Open Platform

Integrate third-party alarm panels or sensors, or connect your workflow to a central station through the OpenEye ecosystem for more video monitoring capabilities.

Two-Way Audio

Listen to or communicate with individuals remotely, providing a more intelligent and integrated way to actively monitor video and directly respond to incidents.
